PROFESSIONAL SUMMARY

Full-Stack Developer with 3+ years of experience building scalable web applications in the fintech domain. Core engineering contributor at a salary-on-demand startup, delivering production-grade React.js frontends, NestJS REST APIs, and CI/CD-automated cloud deployments. Proven track record of shipping MVPs rapidly and reducing operational overhead through automation. Currently upskilling in AI-integrated development with LangChain and MCP Servers. Open to remote and hybrid opportunities.

TECHNICAL SKILLS

Frontend: React.js, Next.js, TypeScript, Redux, Tailwind CSS, Sass, HTML5, CSS3, JavaScript (ES6+), Bootstrap

Backend: Node.js, NestJS, Express.js, REST APIs, Microservices

Database: MongoDB, Mongoose

DevOps & Cloud: Docker, GitHub Actions, CI/CD Pipelines, Google Cloud Run

Tools & Platforms: Git, GitHub, Postman, VS Code

Currently Learning: LangChain, MCP Servers, AI-Powered Development

PROFESSIONAL EXPERIENCE

Full-Stack Developer — Core Engineering Member

Aug 2022 – Feb 2026 · 3 yrs 7 mos

Quick Wage (Fintech | Salary-on-Demand / Earned Wage Access) *Noida, India*

- Built and shipped the lending-partner onboarding MVP using React.js and NestJS, accelerating integrations with new financial partners and reducing time-to-launch for new lending verticals.
- Architected and maintained high-availability NestJS microservices achieving 99.9% uptime, with automated CI/CD pipelines via GitHub Actions and zero-downtime Google Cloud Run deployments.
- Developed an internal HRMS platform (React.js + Node.js + MongoDB) that automated HR and accounting workflows, reducing manual operational workload by ~60%.
- Designed and consumed RESTful APIs across the full request lifecycle — authentication, data validation, error handling, and performance optimization.
- Collaborated directly with founders on product strategy, investor pitch preparation, and pilot rollout execution.

Stack: *React.js · TypeScript · NestJS · Node.js · MongoDB · Google Cloud Run · Docker · GitHub Actions · REST APIs*

Frontend Developer Intern

Aug 2020 – Dec 2021 · 1 yr 5 mos

Capriko Smart Solutions Pvt. Ltd. *Dehradun, India*

- Developed responsive frontend interfaces for e-commerce and corporate client projects using HTML5, CSS3, JavaScript, and React.js.
- Built cross-browser compatible web pages and collaborated with senior developers in an agile team environment.

Stack: *HTML · CSS · JavaScript · React.js · Bootstrap*

PROJECTS

FatJobs.in — Full-Stack Job Aggregation Engine

GitHub | fatjobs.in

Stack: *React 18 · Node.js · Express.js · MongoDB (TTL) · Cheerio · Axios · Cron Jobs · REST API*

- Built a full-stack job aggregation engine that auto-scrapes SDE and Data roles from top-tier ATS boards (Greenhouse, Lever) using Cheerio and Axios, with scheduled Cron Job sync cycles ensuring listings are never stale.

- Implemented MongoDB TTL indices for automatic deletion of listings older than 7 days, plus a uniqueness constraint on application URLs to eliminate duplicate job entries at the database level.
- Designed a real-time card UI with a dynamic freshness indicator system (Neon Green 0–24h / Orange 24–72h / Gray 3–7d), giving job seekers instant visual priority signals to maximise application timing.
- Engineered a multi-filter system with client-side search by company or role, geospatial location filters (Remote, Bangalore, Noida, USA), and backend-driven recency toggles (24h / 3d / 7d) via parameterised API calls.
- Deployed a decoupled architecture — Railway-hosted Express backend and React frontend — with tab-focus triggered re-sync so data refreshes automatically without requiring a manual page reload.

devFit — Full-Stack Fitness Tracking Platform

GitHub | devfit.xyz

Stack: *React 18 · React Router v6 · Node.js · Express.js · MongoDB · Mongoose · JWT · Nodemailer · Recharts · xlsx*

- Architected a full-stack MVC fitness platform (devfit.xyz) with modules for exercise logging, diet tracking with macros (protein, carbs, fats, calories), supplement scheduling, weekly gym plan builder, and a Recharts-powered analytics dashboard.
- Implemented JWT-based authentication with Email OTP verification via Gmail SMTP (Nodemailer), bcrypt password hashing (salt rounds: 12), and rate limiting on all API routes for production-grade security.
- Built a BMI auto-calculator, daily streak tracking system, and browser push notifications for scheduled gym reminders — all wired to a global React Context for seamless auth state management.
- Delivered Excel export of all workout data using the xlsx library, 3 predefined training plans (Beginner / Intermediate / Advanced), a YouTube video library, and a fully responsive CSS Variables-based UI optimised for desktop and mobile.

EDUCATION

Full-Stack + AI Development Bootcamp (Kodex Cohort) — Oct 2025 – May 2026
Sheryians Coding School

Full-Stack Development & Product Engineering Fellowship (Pesto) — Jun 2024 – Dec 2024
Pesto Tech

Bachelor of Technology — Computer Science — Jul 2019 – Jun 2022
GL Bajaj Institute of Technology and Management

Diploma — Computer Science — 2016 – 2018
Uttarakhand Board of Technical Education

CERTIFICATIONS

- JavaScript (Intermediate) Certificate — HackerRank
- ReactJS Developer Bootcamp — React
- Front-End Web Development Certification
- Capriko Smart Solution Certified Java Developer
